## Multiplicity of Presidents.

Martip licity of Presidents.

The Louiswille Democrat (Democratic) March 27, shows how the Radicals are biting off their own noses by crippling the power of the Executive. It declares that the tenure-off office law creates seven or eight different Presidents, Independent of and saperior to the one elected by the people, whom he cannot coutrol and cannot remove. "Does it not make each Department Secretary a President over the whole sphere of list department? Has he not thee power, to the exclusion of the President, to do just what he pleases? To order the army, to control the Treasury, to namage fore kin relations, to regulate the post-oditice, to govern the home department, in short, for each Secretary respectively to be a President of the United States? Thus, when Grant is elected, eight independent Presidents, tool one of whom the people would probably choose, are put in power at the same time. Their duly elected President will be a mere sham—a man without antifority even to appoint a village postunaster, for the President of the Postoillee Department will do hint."

18. The last foreign mail has brought the detailed account of the debate in the Bithsh House of Commons, our March 20th, upon the naturalization and expatriation questions, in which America is so much interested. The debate arose by Mr. W. E. Forster asking the government whether the time was not opportune for attempting to arrive al a mutual understanding between her Majesty's government and the Government of the United States respecting the right of expatriation. Mr. Forster supported the policy of negotiating a fiberal treaty with the United States respecting the right of expatriation for the United States respecting the right of expatriation in Mr. Forster's view; that her Majesty's government did not intend to defend the feudid doctrine of perpetual allegance; that the British unlaster at Washington had been directed to open negotiations on the naturalization question, but that he apprehended difficulty in adjusting details. The speech of Lord Stanley, which was a general review of the whole question as soon as possible, and shows that some advances will be made toward meeting the United States half way at least.

RATHER RACY L'OMMENT.—The Washingreperced grainines, spirits of wife, two kilogrammes, and dissolve. With this solution in interest and in the content of the stable, turning the animals' heads toward the finne, so as to make them breathethe funnes. This operation is performed morning and evening, burning one pad for every three head of eattle. At hight a spirit-lamp filled with the solution is lighted in the stable. To prevent accidents the thine is surrounded with whre gauze. The liquid is also administered internally, with the addition of lifteen grammes of chloroform for the above quartity. A teaspoontal of this is put in the animal's drink three threes a day. As a further precaution the litters are watered with the same solution.

RATHER RACY COMMENT.-The Washington correspondent of the New York Express, of April 4th, says: The Methodist Episcopal New Engiand courference, held in Bosion, the Chronicle here lefts ns, has come out for linpeachment, Ben. Wade and Gen. Grant. We, outsiders of the Wade and Gen. Grant. We, outsiders of the Methodist Episcopal Church, rather enjoy this, and think the conclusion ought to rend thins:

this, and think the conclusion ought to read thus:

Be it resolved, That Ben. Wade, because of his piety, and horror of profanity, his devolute to God, and horror of the devil, ought to be foremost among all men the Methodisi Episcopal Church of New England supports. Be it forther resolved, That Gen. Grant, lover of fast 2 tol horses, and of races, and especially of old Bourbon, pre-eminently qualifies him for the support of the Methodist Episcopal Church.

OFFILE OF THE LOCASVILLE DEMOCRAT, )
Theselay Evening, April 7, 1868. 1
LOUISVILLE, K.V., March 21, 1868. . B. Mognard, Esq., Connecreial Estelor Lanes valle Democrat:

per cent., which, if saved to us, would, in a short time, uncke us independent in the toal-leer of the insurance premiums. May we call your abouton to the Kentneky and Louis-vith Malcad insurance compact, than which none is more economically and better managed. That cost no twenty or len per cent, of its business to pay expenses; hence the small rade of premiums paol to this company; not more than three-tenths of one per cent, per amount on in average.

Now what we want is two or more new threeonipanies, with a capital each of \$500,000 located in Louisville, which, with the other elabtor nine companies we now have, can dealt or nearly all of the business which is likely very soon to offer; and if these should not be sufficient of their three should be originized, and agencies sent into the towns of the State of Kentneky to protect the enstoners of our merchants against fire basses. These companies, forganized by our best ellizans, will make money hand over hand at twenty to twenty-tive per cent, less than the present rates of premiums, and at the same time give ample protection. As far as ascertained our local companies have made money, some have saved two-thirds of their premiums in the last ten years, while the average rates of premiums have been from fifteen to twenty-per cent, less since the infroduction of our new fire department than the present rates, as well be shown by papers herewith tiled, wearsely at 10. wide Democrat:
